

Vol. 03 Issue 03

INFINITY

Together, Forward

Key Highlights

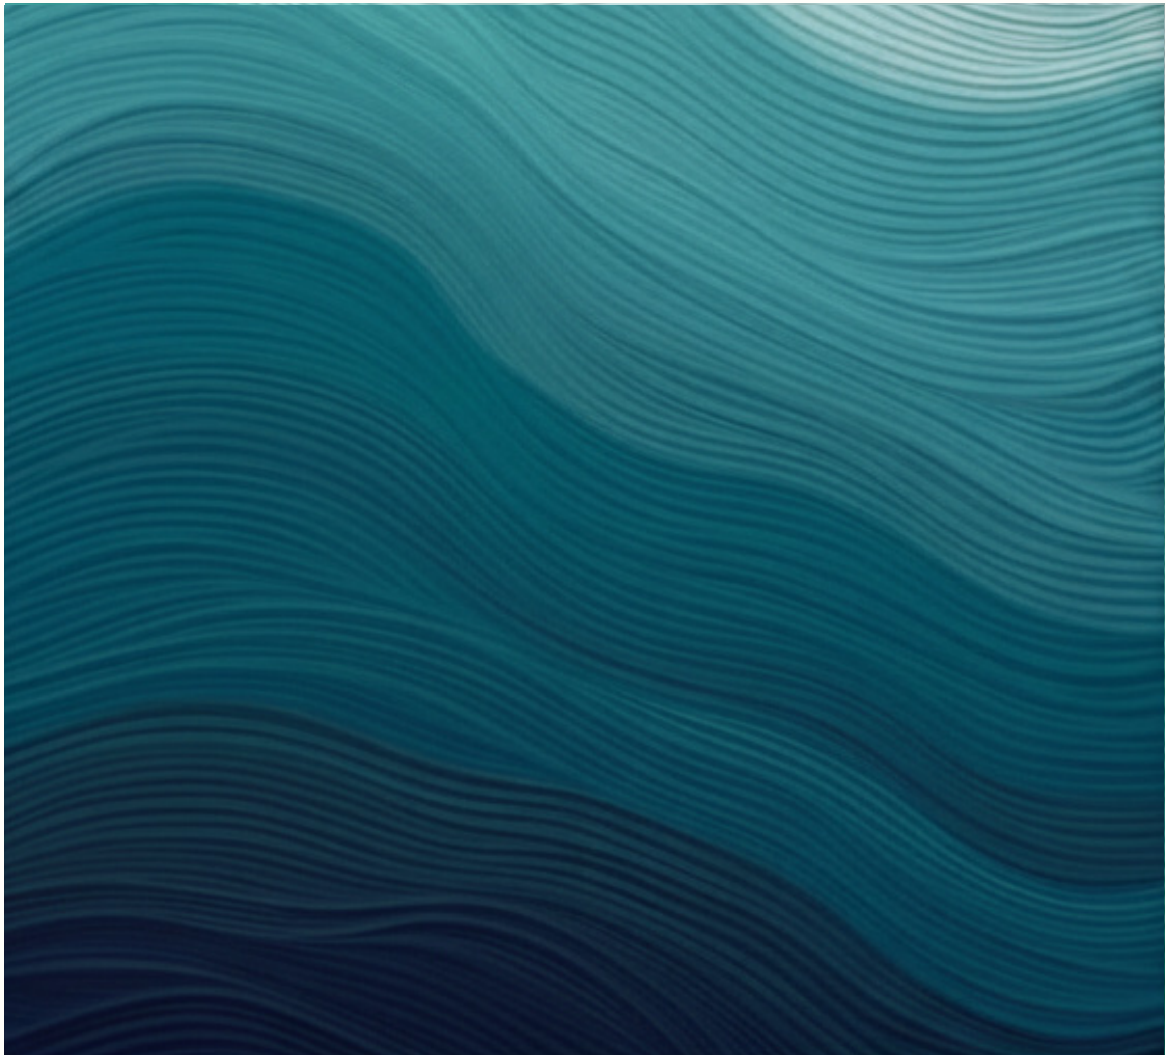

Legacy Continued

Celebrating 13 Years of DigiMantra and our growing collaborations with leading universities.

Purpose-Led Progress

MoUs, upskilling, and CSR efforts that strengthened connections beyond code

Quote of the Issue

Innovation is the bridge between what is and what can be.

Editor's Note

Every edition tells a story of growth- not just in what we achieve, but in how we evolve together. Together Forward isn't just a theme; it's a reflection of how every idea, every partnership, and every milestone contributes to the larger rhythm of progress at DigiMantra.

This issue embodies that spirit- of people coming together with purpose, learning through collaboration, and creating impact that lasts. Much like the shades that flow through these pages, it captures a sense of renewal, momentum, and grounded optimism- the kind that defines who we are and where we're headed.

Across these stories, you'll find traces of that journey- the strengthening of academia-industry partnerships, the pursuit of innovation with empathy, and the quiet consistency of those who've shaped our growth through years of dedication. Every feature, every reflection, adds depth to the larger narrative of moving forward- not in isolation, but in unison.

As we continue to navigate a changing world of technology and ideas, what truly sets us apart is our ability to stay human at the core- to build connections, nurture learning, and celebrate progress that uplifts everyone around us.

With each page you turn, may you find the same sense of connection and purpose that inspired its creation- a reminder that progress is most powerful when it's shared.

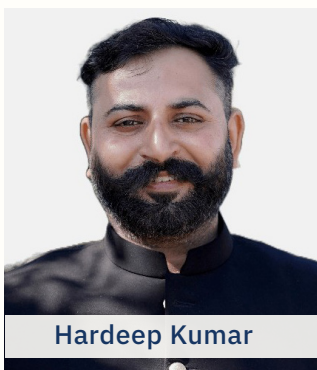

Here's to building, learning, and rising Together Forward.

Happy Reading!

Internship Milestone

Learning, Growing, Achieving Together

On July 7, our six months of dedication culminated in a proud moment at DigiMantra's Ludhiana office with the certification ceremony for the very first batch of DMLearning interns. This milestone was more than just an endpoint; it was a celebration of learning translated into impact, of knowledge applied in the real world.

Guided by the expertise of Mr. Harsimran Singh (Senior Solution Architect), Ms. Manpreet Kaur (Associate Director of Project Delivery), and Ms. Lovenish Godia (HR Executive), the interns gained far

more than technical skills. They discovered professional confidence, adaptability, and the readiness to take their next step into the future.

Certificates of completion and curated goodie bags were presented by Mr. Bikramjit Singh, Global VP at DigiMantra, as a gesture symbolizing encouragement, appreciation, and belief in the journeys ahead.

This achievement marks the start of new journeys, built on collaboration, learning, and shared growth.

Code & Beyond

Learning, Building, Achieving

The Summer Bootcamp 2025 under DMLearning, an initiative by DigiMantra, concluded after an intensive 45-day journey. Across tracks in Full Stack: MERN, AI with Python, Cybersecurity, and DevOps with Cloud Computing, learners built live projects, explored industry workflows, and strengthened professional skills, all in collaboration with CT University.

A standout moment was the guest lecture by Mr. Rohit Puri and Mr. Anurag Thakur, who shared insights from real world projects, from strategic planning to quality control, giving interns a glimpse of professional practices beyond the classroom.

The bootcamp blended hands on learning, mentorship, and teamwork, leaving a lasting impact on the learners and preparing them to step confidently into the tech world.

“The future belongs to those who learn more skills and combine them in creative ways.”

- Robert Greene

Securing the Future

Cybersecurity, AI, Insights

On July 25, team DigiMantra attended the RCA - Regional Cybersecurity & AI Conference 2025 at Hotel Taj, Chandigarh, hosted by the PHD Chamber of Commerce and Industry. The event brought together experts, innovators, and law enforcement to explore emerging risks, AI-driven challenges, and frameworks like the DPDP Act 2023.

Key sessions offered eye-opening insights, from understanding how AI and Deepfakes are shaping cyber threats to learning practical tools like “VirusTotal” and “Have I Been Pwned” for digital protection. Attendees also gained unique perspectives from Netflix producer on real-life digital scams, and from frontline officers on cyber law enforcement in Punjab, Haryana, and Chandigarh.

Our participation reinforced DigiMantra’s commitment to responsible, secure technology. Beyond learning, it was an opportunity to engage, collaborate, and translate knowledge into actionable practices, ensuring that as technology evolves, so does our ability to protect, innovate, and grow together.

Global Recognition

Building, Mentoring, Leading

On July 29, our CEO, Mr. Sachin Khosla, was honored with membership in the Global Council of TiE Chandigarh. This recognition represents more than a title it reflects a commitment to shaping the entrepreneurial ecosystem and supporting the next generation of startups, innovators, and solopreneurs.

For DigiMantra, this milestone is a natural extension of our philosophy: to grow with purpose and share knowledge that

empowers others. Through this role, Sachin is positioned to guide, mentor, and enable emerging ventures, translating years of experience into actionable insights for the wider community.

The honor is a testament to the belief that leadership is measured not just by scaling a company, but by investing in collective growth. It's a moment that underscores how DigiMantra moves together, forward from building solutions to building

Design Dialogue

On August 7, DigiMantra, under its MoU with Chitkara University, conducted a knowledge-sharing session with the B.Des batch. The session, led by our Global VP, **Mr. Bikramjit Singh**, explored the evolving role of design in a tech-driven world, from creating intuitive user experiences to aligning creativity with real product strategy.

The interaction went beyond theory, encouraging students to think critically, question deeply, and see design as more than aesthetics as a force that drives usability, function, and innovation in the real world.

Where Creativity Meets Impact

Special thanks to **Dr. Gopal Meena (PhD)** for the support and collaboration that made this session possible. It was a meaningful step in bridging academics and industry, shaping curious, informed, and future-ready designers.

Together Towards Growth

From Classrooms to Corridors of Innovation

On August 21, DigiMantra welcomed students from CT University to our Mohali office for an immersive industry visit. The day was designed to give future technologists a first-hand look at how ideas turn into impact within a professional setup.

The session, led by Mr. Anurag Thakur (Technical Project Manager, DigiMantra),

opened doors to conversations around emerging tech trends, workplace dynamics, and the skills that prepare students for tomorrow's challenges. From observing live projects to engaging with mentors across teams, the students didn't just tour an office, but they experienced the rhythm of how collaboration, strategy, and innovation come together in real time.

Each visit reminds us why these bridges matter: they give students a lens into possibilities and remind us, as an industry, of the responsibility we carry in shaping the next wave of talent.

Future in Focus

AI, Scalability, & the Spark of Shared Curiosity

On 26th August, DigiMantra's Mohali office became a space where ideas met possibility.

Led by Mr. Sumit Kumar (Team Lead, Full Stack) and Mr. Shrey (Software Developer), the technical session explored how AI and scalability are reshaping the way we build, think, and innovate.

What made it impactful wasn't just the knowledge shared it was the questions asked, the perspectives exchanged, and the collective drive to look ahead. Because at **DigiMantra**, every session is more than training; it's a step forward in reimagining what the future can be.

Industry Connect

Bridging Classrooms with Real-World Tech

On 28-29 August, DigiMantra opened its doors to students from the CT Group of Institutions for an immersive two day industrial visit. What began as an exploration quickly transformed into an inspiring journey, where curiosity met innovation, and classrooms connected seamlessly with real-world technology.

The students had the opportunity to interact with Mr. Anurag Thakur (Technical

Project Manager) and Mr. Sumit Kumar (Tech Lead, Full Stack), who shared not just industry insights but stories of challenges, problem-solving, and growth in the fast evolving tech space. These conversations sparked fresh ideas and gave students a glimpse into the exciting possibilities their careers could hold.

At DigiMantra, we see such initiatives as more than visits; they are catalysts for building confidence, perspective, and ambition. Together, we move forward by nurturing the next generation of creators, dreamers, and innovators who will define the future of technology.

Learning in Action

Shaping Students Through Industry Exposure

On 11 September, DigiMantra welcomed B.Tech (2nd year) students from CT University for an engaging industrial visit under the **DMLearning** initiative. The day was designed to spark curiosity, bridge classroom knowledge with real world applications, and provide students with a glimpse into the world of modern technology.

The sessions were led by Mr. Basant Choudhary (Node.js Developer) and Mr. Brijeshwar Saini (Sr. Web Developer), who shared valuable insights into industry practices, evolving tech trends, and the skills essential for building future ready careers. Their interactive discussions encouraged students to look beyond theory and embrace the practical side of problem-solving and innovation.

Such experiences inspire exploration, nurture practical skills, and give students a clear view of the tech landscape ahead. By blending learning with real-world insights, students gain confidence, perspective, and the drive to grow into the next generation of industry leaders.

Legacy Leaders

Inspiring Innovation and Leadership Paths

On 12 September, LPU School of Computer Science Engineering hosted the Alumni Techpreneurs Conclave 2025, a gathering that celebrated entrepreneurial journeys, innovation, and leadership. The event offered students and attendees a unique opportunity to learn from alumni who have made remarkable strides in the tech and business world.

Mr. Sachin Khosla, Founder & CEO of DigiMantra, was honored as a distinguished alumnus for his contributions and achievements, alongside other successful company founders, directors, and CEOs from the alumni network. Their

stories of vision, perseverance, and impact provided invaluable insights for aspiring techpreneurs.

Events like these are more than celebrations; they serve as platforms for inspiration and knowledge-sharing. By connecting past achievements with future ambitions, the conclave encouraged the next generation to dream bigger, innovate boldly, and move forward with confidence.

Moments Together

**Celebrating the smiles,
milestones, and
memories that move us
forward.**

Unleashing Creative Minds

Guiding Talent Towards Professional Excellence

On 19 September, DigiMantra conducted a placement drive at Chitkara Design School as part of our ongoing efforts to strengthen industry-academia collaboration under the MoU. This initiative, carried out under the DMLearning banner, provided a platform for students to showcase their creativity and explore opportunities in design and technology. The drive was led by Mr. Bikramjit Singh, Global VP at DigiMantra, alongside Mr. Divit Sood, our UI/UX Designer, who personally engaged with students to share insights and guidance.

We also appreciate the support of Mr. Gopal Meena, VP at Chitkara Design School, for facilitating this initiative.

For DigiMantra, programs like this exemplify our belief in moving together forward, nurturing young talent, encouraging innovation, and building stronger ties between education and industry to shape the next generation of design thinkers and tech innovators.

Innovation Pulse

Driving Growth and Collaboration in AI

On 19 September, the AI community converged at CT University for the much-anticipated AI Conclave 2025. DMLearning, an initiative by DigiMantra, proudly participated as a Gold Sponsor, supporting a platform where knowledge, creativity, and innovation intersect. The event showcased a vibrant mix of expert keynote sessions, panel discussions on practical AI applications, live project

demos, and student competitions that fostered learning and networking.

A standout moment was when Mr. Harsimran Singh, Senior Solutions Architect at DigiMantra, was recognized with a Token of Gratitude for his contributions to advancing AI across academia and industry. Such recognition reflects our ongoing commitment to nurturing talent and pushing the boundaries of technology.

For DigiMantra, events like the AI Conclave serve as more than gatherings; they are catalysts for building the next generation of thinkers, problem-solvers, and AI innovators. By coming together, we not only celebrate the present achievements in AI but also collectively move forward toward a future of endless possibilities.

Next-Gen Teaching

Equipping Educators With AI Skills

On 25 September, DigiMantra, through its DMLearning initiative and in line with the recently signed MoU with Shoolini University, hosted a cutting-edge Faculty Development Program (FDP) focused on AI-driven teaching and learning. The session brought faculty closer to the future of education, showing how artificial

intelligence can make classrooms more interactive, insightful, and impactful. Mr. Bikramjit Singh, Global VP of DigiMantra, led the session with hands-on

insights, demonstrating practical ways to integrate AI into teaching. Faculty engaged actively, exploring innovative methods to bridge academic learning with real world industry expectations and emerging trends.

More than a training session, this FDP ignited curiosity, sparked collaboration, and inspired a vision for an agile, forward thinking education system. Such initiatives are shaping empowered educators who will prepare students for the challenges and opportunities of tomorrow.

Digital Horizons

Igniting Passion for Emerging Tech

On 29 September, DigiMantra, under its DMLearning initiative, had the pleasure of engaging with B.Tech 3rd-semester students at CGC University, Mohali. The session explored “The Future of Web Development: Emerging Trends & Technologies”, providing students with insights into the evolving digital landscape.

Mr. Akshay Kumar Prabhakar, Technical Lead PHP at DigiMantra, led the discussion, highlighting the latest tools, techniques, and industry practices.

The interactive session encouraged students to think ahead and understand how to craft digital experiences that align with tomorrow's industry demands.

Beyond a lecture, this engagement served as a bridge between academia and real world tech practices. It inspired students to envision their roles in shaping future digital solutions while strengthening industry academia collaboration.

Together Through the Years

**Honoring the dedication, spirit,
and leadership.**

Manpreet Kaur

Associate Director Project Delivery

8 years in DigiMantra, Manpreet has been at the heart of project excellence leading with clarity, compassion, and conviction. Her journey reflects the power of experience, the grace of leadership, and the spirit of moving forward together.

Rishab Kumar

Team Lead Mobile

7 years in DigiMantra, Rishab's story is one of innovation and impact. His technical acumen and calm leadership have transformed challenges into milestones proving that true growth is built, one line of code and one leap of vision at a time.

Salesesh Kumar

Sr. Front-End Developer

7 years in DigiMantra, Salesesh's seven-year journey reflects the strength of consistency and craft. With an eye for precision and a heart for collaboration, he's helped shape seamless digital experiences that stand the test of time.

Mayank Setia

Sales Head

6 years in DigiMantra, with strategy as his compass and collaboration as his strength, Mayank has spent years helping DigiMantra expand its reach and relationships. His drive embodies what it means to grow a business that's built on trust.

Rohit Puri

Key Account Manager

5 years in DigiMantra, Rohit's journey mirrors the value of partnership nurturing clients, empowering teams, and turning opportunities into long-term success stories. His dedication continues to strengthen DigiMantra's foundation of trust.

Uma Shankar

Operations Manager

6 years in DigiMantra, steady, sharp, and solution-driven Uma has been the unseen force keeping operations running seamlessly for years. His contribution stands as a reminder that progress thrives on precision and persistence.

Vaneet Kaur

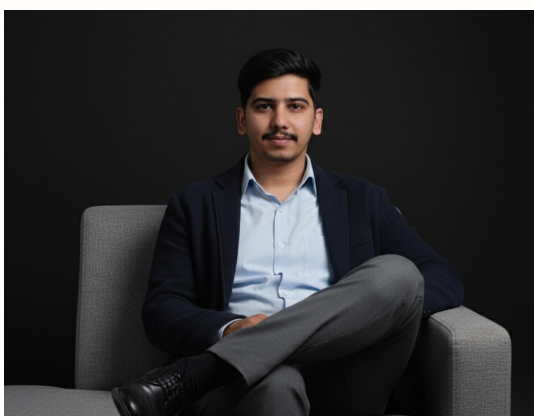

Team lead- React

5 years in DigiMantra, Ankit's five-year path has been defined by passion and precision. From building intuitive interfaces to enhancing user experiences, his work reflects a commitment to excellence and a mindset of continuous learning.

Ankit Rana

Sr. Mobile Application Developer

5 years in DigiMantra, With creativity and clarity as her tools, Vaneet has spent five years turning complex challenges into elegant solutions. Her leadership bridges innovation and execution, inspiring her team to deliver with purpose.

Shubham Bhardwaj

MERN Stack Developer

5 years in DigiMantra, Shubham has grown from a coder to a creator weaving innovation into every project he touches. His journey is proof that every contribution, no matter how quiet, shapes the bigger story of who we are.

The Right Things Always Just Are!

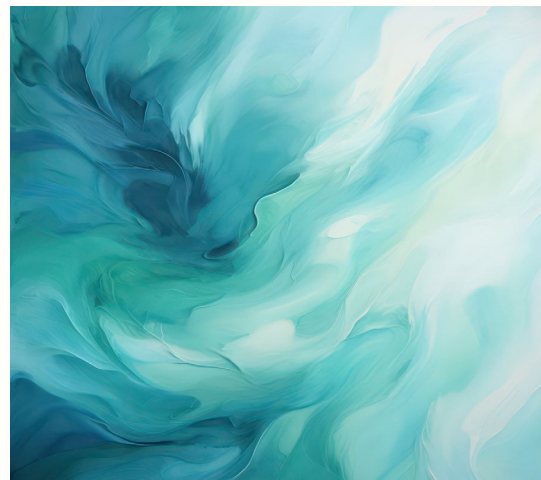

Hi, I'm Zeeshan. A quiet thinker, yet talkative when it matters. A designer who loves to write and explore ideas people can connect with.

I never planned to become a designer. When I failed CA, I wondered, "What now?" Over time, I realized life doesn't always give us what we ask for; it gives us what we are meant for. That's how design found me.

This journey taught me that you don't need everything figured out to start. Some of the best experiences come when you follow curiosity and listen to your heart.

At DigiMantra, every project feels like a story, every challenge like a classroom. Creativity isn't just about visuals; it's about thinking, connecting, and expressing yourself without fear.

Along the way, I've discovered that first impressions can be misleading. Colleagues I once assumed were distant turned out to be warm and kind. Real connection comes from openness and listening.

Life and creativity, I've learned, are about expressing honestly, failing bravely, learning constantly, and connecting deeply. I admire those who live authentically, and I hope to grow into someone open, honest, and full of life.

For me, creativity isn't just work- it's how I choose to live. My story is still unfolding, and I'm excited to see where life leads next, trusting that the right things always just are.

Excited to see where life takes me next
Together Forward.

Zeeshan

The Culture Code

Built Between Breaks

Every team has its own rhythm. I feel ours sits somewhere between chaos and creativity- and honestly, that's what makes it fun.

We've got coders deep in logic, designers chasing perfection, marketers with ten ideas a minute, and HR trying to keep all of us from losing it. Sales keeps the buzz alive, Ops keeps the wheels turning, and Finance... well, they remind us that budgets exist. It's a circus sometimes, but it's our kind- full of energy, noise, and heart.

What really stands out to me is how we show up for each other. When someone's stuck, someone else jumps in. When deadlines get crazy, so do the jokes and chai breaks. That's our real culture- not written in policies, but built in moments.

Now with AI slipping into the mix, things have changed a bit. I see people curious, cautious, even competing with it. But here's what I think- AI can automate tasks, not teamwork. It can help us work smarter, not replace how we connect, think, or care.

At the end of the day, culture isn't about what we say- it's what we create together: trust, laughter, and the courage to keep learning.

Like Peter Drucker said, *"Culture eats strategy for breakfast."*

And he's right- because no matter how advanced our tools get, it's still people who make the magic happen.
